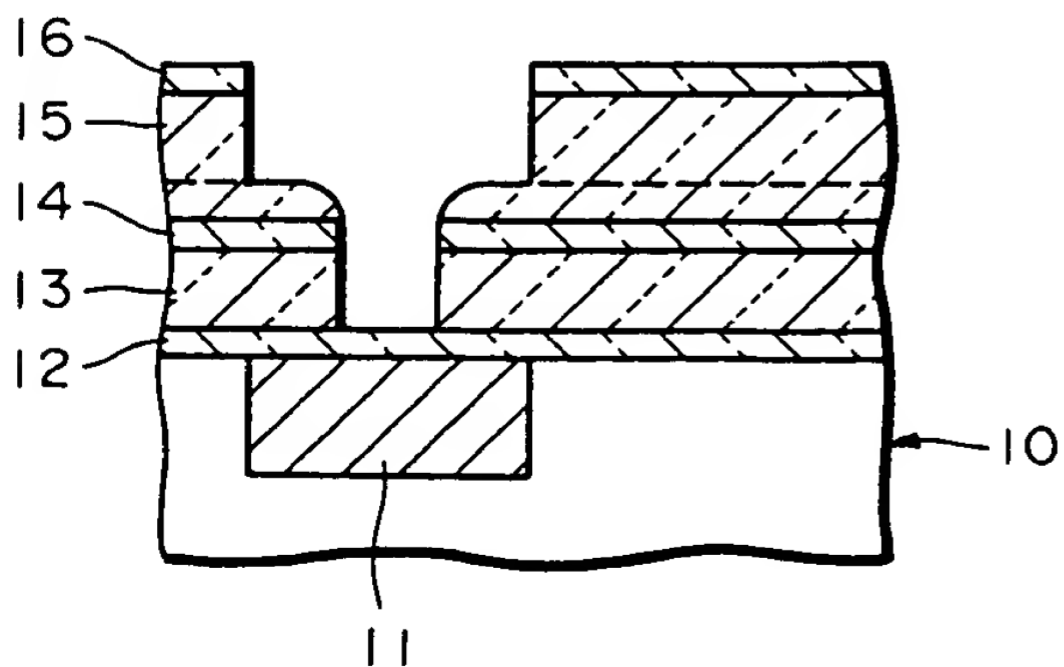

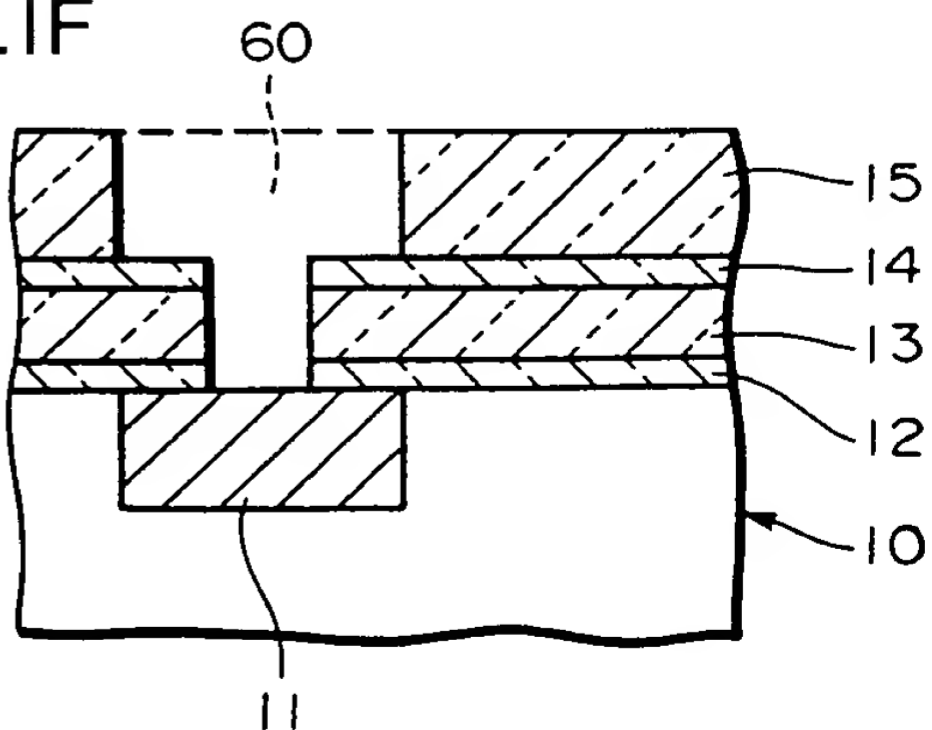

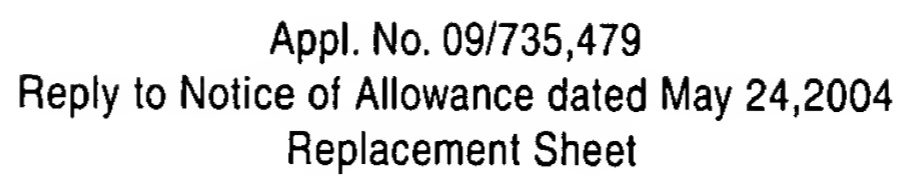

FIG. 1F

[illegible]

A cross-sectional view of a multi-layered structure. The structure consists of a base layer (10) and a top layer (15) separated by an intermediate layer (12). The top layer (15) is divided into two main sections by a central gap. The left section of the top layer (15) is further divided into two sub-sections by a horizontal line (56). The right section of the top layer (15) is also divided into two sub-sections by a horizontal line (56). The intermediate layer (12) is a single continuous layer. The base layer (10) is a single continuous layer. The structure is shown in a cross-sectional view with hatching indicating different materials or layers.

[illegible]

A cross-sectional view of a multi-layered structure 10. The structure consists of several layers: a top layer 16, a layer 15, a layer 56, and a bottom layer 12. The structure is divided into two main vertical sections by a central gap. The left section has a stepped profile with a top layer 16, a layer 15, and a layer 56. The right section has a similar profile but with a different layer arrangement. A dashed line is shown within the right section, possibly indicating a boundary or a specific layer. A label 10 points to the overall structure, and a label 11 points to the central gap.
